Jansen Steel Systems Inspire Architecture

Jansen is a Swiss-based manufacturer of architectural steel systems for doors, windows, and facades, with a U.S. subsidiary in New York City. The company's steel systems are designed by experienced Swiss and German engineers and are known for their strength, thermal performance and security. Jansen's products offer standard and customized solutions and are backed by innovative software, technical consultation, and project management support.

Founded in 1923, Jansen is a family-owned company managed by the third generation. Headquartered in the Rhine Valley of Switzerland, a hub for construction and engineering innovation, Jansen's steel systems grace high-end residential and hospitality buildings around the world.

Jansen America provides local support for residential architects, interior designers, and home builders who want to explore creative residential solutions with premium steel architectural systems. The company is committed to providing sustainable, aesthetic, and unique solutions to inspire its customers.

The Steel Advantage

The fabric of Jansen's DNA lies within cold-drawn steel, which produces firm, smooth architectural profiles—the cornerstone of steel systems—with high tensile and torsional strength. This makes them long, straight, strong, and able to handle the rigors of powder coating ovens. Jansen's strong steel profiles enable infinite architectural capabilities while enhancing sustainability. The result is signature pieces and remarkable views that people remember.

Architectural Creativity

Strong architectural steel pushes the boundaries of unique shapes and sizes, enabling architects to create signature pieces that make buildings iconic.

Environmental Performance

Industry-leading frame U-values maximize a building's thermal performance.

Less Frame, More View

Steel system strength enables smaller frames that can bear larger spans of glass, offering more views with less profile.

Products & Applications

Jansen's steel systems are ideal for doors and windows, wine cellars, and oversized signature pieces.

Janisol Arte 2.0 Steel Profile

Explore the elegance and high thermal performance of the Janisol Arte 2.0 steel profile. Crafted from standard, stainless, or Corten steel, this profile offers sophisticated beauty while maximizing living space.

Finline 70 Steel System

Discover the exceptional thermal efficiency and sleek aesthetics of the slim-as-a-credit-card Finline 70 steel system. With pleasing glazing beads and handles, it combines top-notch performance with stunning design.

Art'15 Non-Insulated Steel Profiles

Art'15 non-insulated steel profiles are perfect for luxury home interiors and warmer climates, where thermal performance isn't a top concern. Art'15 is the ideal blend of style and functionality.

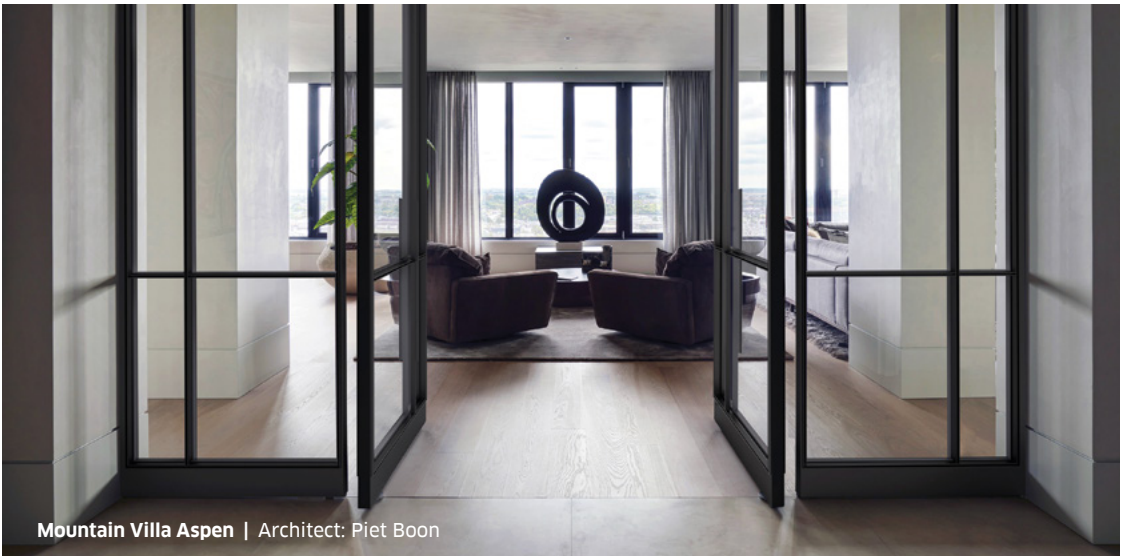

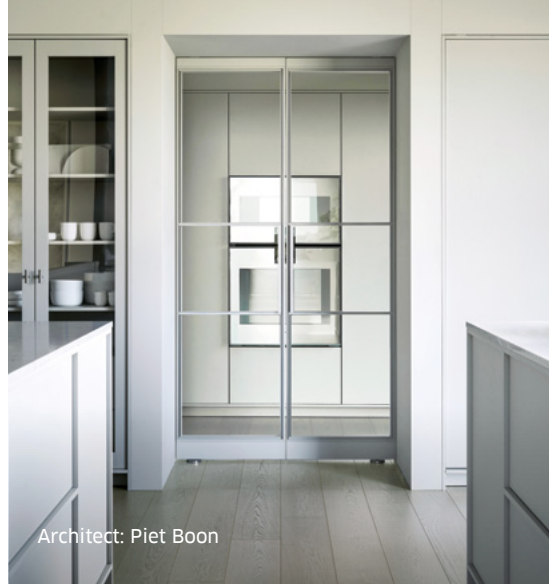

The Piet Boon Series: Premium in Unique Aesthetics

The Jansen Piet Boon Series is a collaborative effort between a global leader in steel architecture and a global leader in design.

Studio Piet Boon is a globally renowned exterior, interior, and product design firm. The Dutch-based studio strives for the perfect balance between functionality, aesthetics, and design.

With simplicity and detail, beauty and richness is crafted into every aspect of the door, including a delicately balanced and slim profile, warm colors, and unique hinges and hardware that complement a bespoke design.

The Jansen Piet Boon Series is custom-made in the USA by steel craftsmen who share the Piet Boon passion for beauty and perfection.
